Experience

Celebal Technologies

June 2024 – July 2024

Frontend Development

Remote

- Developed responsive and user-friendly web interfaces using HTML, CSS, JavaScript.
- Built and maintained reusable UI components, improving visual consistency across pages and reducing repeat development effort for the team.
- Optimized website layouts and styling for cross-browser compatibility and responsiveness.

Skills

Programming Languages: Python, C++

Web Technologies: HTML5, CSS3, JavaScript, React js, Tailwind CSS

Tools: VS Code, Github

Database: SQL

Soft Skills: Teamwork, Problem-solving, Presentation & Coordination

Projects

Tech Fest Event Management Website | *HTML, CSS, JavaScript*

- Developed a responsive website for the college Tech Fest as part of a team project.
- Designed and implemented an online registration form for participant enrollment.
- Created dedicated sections showcasing event details, schedules, and fest activities.
- Developed a committee information page displaying Core Committee Members, Coordinators, and Volunteers with their photos and roles.

Spotify Clone | *HTML, CSS*

- Designed and implemented a visually engaging, static clone of Spotify's user interface.
- Replicated core UI components, including navigation, library sections, playlists, and playback controls, ensuring a sleek and modern appearance.
- Created responsive layouts using CSS to optimize for various screen sizes and devices.

Weather Forecast Application | *HTML, CSS, JavaScript, OpenWeatherAPI*

- Developed a responsive weather application that fetches real-time weather data using a weather API.
- Implemented city-based search to display live temperature, humidity, wind speed, and current conditions, with timezone-aware local time formatting.
- Handled common failure cases (invalid city, network errors) with clear user-facing status messages instead of silent failures.
