Bengaluru, Karnataka, India

+91-8910096446

Summary

Senior Backend Engineer with 5+ years of experience building scalable, high-availability microservices and low-latency REST APIs using Java and Spring Boot. Proven expertise in distributed systems, event-driven architecture, and financial systems, with a strong focus on performance optimization, data consistency, and cloud-native design with working knowledge of frontend technologies (**ReactJS, JSF, AngularJS, Flutter**).

Experience

Newbridge Fintech (Ajackus)

Nov 2025 – May 2026

Senior Software Engineer

Remote

- Implemented scalable **fault-tolerant backend systems** and maker-checker workflows using Java-17/Spring, NextJS and PostgreSQL.
- **Owned** obligation management system for financial lifecycle tracking with strong **data consistency**.
- Built **scalable, resilient schedulers** for high-volume batch processing, improving throughput and reliability.
- Designed and engineered notification system using **RabbitMQ event-driven architecture** supporting read/click tracking.
- Designed and implemented async PDF generation pipeline reducing latency by 40% and improving scalability.
- Designed scalable microservices and backend services aligned with API-driven architecture, ensuring high availability and low latency.

BNP Paribas CIB

Mar 2025 – Oct 2025

Senior Software Engineer

Bengaluru

- Migrated legacy applications to Jakarta EE 10 (Java 17, Spring 6), improving performance and reliability.
- Built **secure, low-latency RESTful APIs** with robust authentication.
- Enabled integrations using **APIGEE API Gateway**.

Mercedes-Benz/Daimler (Capgemini)

Sep 2020 – Mar 2025

Java Developer

Bengaluru / Remote

- Built microservices processing 10K+ contracts using **Spring WebFlux**, Kafka for **high-throughput systems**.
- Implemented batch pipelines with **performance optimization**.
- Built RabbitMQ messaging systems improving efficiency by 40%.
- Implemented and tested REST APIs using Spring boot and **JUnit/Mockito**.

Skills

Languages: Java, JavaScript, Bash, Dart, Python, C/C++

Frameworks: Spring Boot, Spring Security, Spring JPA, Hibernate, Spring Cloud, Spring Batch, Spring WebFlux

Architecture: Microservices, Distributed Systems, Event-Driven Architecture, REST APIs, RESTful Services, API-driven Architecture, High Availability, Scalability

Databases: SQL, PostgreSQL, OracleDB

Cloud/DevOps: AWS, Kubernetes, Docker, Jenkins, CI/CD

Messaging: Kafka, RabbitMQ

Tools: APIGEE, JUnit, Mockito

Other: System Design, Multithreading, Design Patterns, SOLID, Concurrency

Projects

ISRO Chandrayaan-3

2020

Vision Guidance Contributor

India

- Built computer-vision based navigation algorithms using MATLAB and C under **real-time constraints**.
- Applied image processing for trajectory correction using the lunar lander's control systems with **optimization focus**.

Education

Jadavpur University — B.E. Instrumentation & Electronics Engineering

2016 – 2020
